Ecological Modeling 101 (1997) 373

ECOLOGICAL MODELLING

Author index

Volume 101 (1997)

Aber, J.D. 61
Ághová, Ľ. 175
Author, A. 137
Axelsen, J.A. 15

Basset, A. 153
Bonham, C.D. 163
Brockway, F. 97
Brovkin, V. 251

Cescatti, A. 263, 275
Cetina, M. 195, 209
Challenor, P. 41
Colvin, J. 185

DeAngelis, D.L. 153
Dedik, L. 175
Diffendorfer, J.E. 153
Driscoll, C.T. 61
Dubey, B. 123
Ďurišová, M. 175

Ganopolski, A. 251

Håkanson, L. 229
Hamers, T. 15
Harmon, R. 41
Holst, N. 15
Holt, J. 185

Katerji, N. 361
Klepper, O. 1
Krogh, P.H. 15

Levin, S.A. 323
Lopez, J.A. 27
Luk, G.K. 97

Mastrorilli, M. 361
Mateu, J. 27
Metzger, K.L. 163
Mitsch, W.J. 139

Olde Venterink, H. 345
Ollinger, S.V. 61
Özesmi, U. 139

Rajar, R. 195, 209
Rana, G. 361
Reich, R.M. 163

Semádeni-Davies, A. 301
Shapiro, H.D. 113
Sirca, A. 209
Strand, Ø. 285
Svirezhev, Y. 251
Svirezhev, Y.M. 79

Ulvestad, K.B. 285
Usó-Domènech, J.L. 27

von Bloh, W. 79

Wassen, M.J. 345
Wilber, P.G. 113
Wu, J. 323

Subject index

Volume 101 (1997)

Actual evapotranspiration, 361
Agelaius phoeniceus, 139
Aquaculture, 285

Bioaccumulation models, 97
Biosphere, 79
Body burden, 97
Breeding distribution, 139

Calibration, 1
Canopy architecture, 275
Canopy structure, 263
Carbon cycle, 79
Chernobyl, 229
Coastal sea, 195
Combination model, 361
Competition, 163
Crown shape, 263
Cs-137, 229

Data assimilation, 41
Degree day, 301
Depletion, 123
Diatom dominance, 285
Differential equations, 27
Diffuse radiation, 275

Ecohydrological modelling, 345
Ecological models, 195
Ecosystem model, 61
Ecosystem modeling, 163
Ecosystems, 27
Eimeria, 113
Empirical–statistical, 345
Environmental impact assessment, 345
Environmental systems, 175
Expert knowledge, 345

Fertilization, 285
Fish, 97, 229
Flow equations, 27
Fog, 175
Folsomia fimetaria L., 15
Framework, 323
Freshwater marsh, 139
Functional response, 153

Generic parameters, 301
Geographic infromation system (GIS), 139
Gibbsian pairwise potential model, 163
GIS, 61
Grain sorghum, 361
Grass, 251
Grasshopper, 185
Grazer population, 153
Gutierrez simulation model, 15

Habitat model, 139
Harvard forest, 61
Host-parasite interactions, 113
Hubbard brook, 61
Hydrodynamic models, 195, 209
Hypoaspis aculeifer Canestrini, 15

Individual-based, 113
Individual-based model, 153

Japan sea, 209

Lake circulation, 209
Lakes, 195, 229
Landscape model, 153
Large scale, 301
Laurentian Great Lakes, Ohio, 139
Light microclimate, 263
Linear dynamic system, 175
Logistic regression, 139

Mass transport modelling, 209
Mass transport models, 195
Mathematical model, 123, 185
Mercury cycling, 209
Metapopulation, 185
Migration, 185
Minimal model, 79
Model reduction, 1
Models, 229
Monthly meteorological data, 301
Multi-species point pattern, 163
Multivariate analysis, 1

Nature conservation, 345
Nesting, 139
Nitrate leaching, 61
Nitrification, 61
N mineralization, 61
NPP, 61
Numerical methods, 195

Observational studies, 175
Oceanic ecosystem model, 41
O. senegalensis, 185

Parameter estimation, 41
PCA, 275
PCB modelling, 285
PCBs, 97
Picea abies, 275
Plant functional types, 251
Predator, 185
Predator–prey interactions, 15
Predawn leaf water potential, 361
Predictions, 229
Processes, 229

Radiation regime, 263
Radioactive pollutants, 209
Red-winged blackbird, 139
Regional predictions, 61
Resources, 123

Seasonal habitat, 185
Sensitivity analysis, 1
Shoot structure, 275
Simulation scheme, 323
Snowmelt, 301
Soybean, 361
Spatially-explicit, 113
Spatially-explicit model, 153
Spatial model, 139
Spatial modeling, 323
Spatial statistics, 163
Spermophilus, 113
Stability, 153
Statistical regression, 27
Stochastic, 113
Sunflower, 361

Three-dimensional modelling, 195
Trees, 251
Two species ecotoxicological test system, 15

Uncertainty analysis, 1

Vegetation classification, 251

Water quality models, 209
Water stress, 361
Water yield, 61
Wetland management, 139
Wildlife management, 139
